2026 Private Treaty Offering
Yearling Simmental & Sim-Angus Bulls

Hauck Ranch 7407 101 St. SE Forbes, ND 58439

Greetings Cattlemen

Welcome to our 9th annual private treaty bull sale. It's been another advantageous year for cattle producers, particularly the cow-calf producer. With the nation's cowherd at lowest level in recent history, I'm optimistic these higher prices will continue to stick around for awhile.

Genetic decisions made today will impact your herd far longer than than most realize. Even if the bull only breeds for four years, his last daughters will hopefully still be around as 10 year old cows in 2040. When picking your next herd bull, it's food for thought that your cowherd will start to model your seedstock suppliers'. All of the sale bulls are backed by easy fleshing, big ribbed, feminine made females with a sound and functional udder and legs. We focus a lot of time on our maternal genetics trying to eliminate any problems before it reaches our customers.

Once again, we feel there is a good mix of bulls in the offering. These bulls represent the top 5% of our herd. We are confident in the quality of our genetics and frankly put, we will not sell bulls that we wouldn't be comfortable using on our own cows. Both performance bulls as well as heifer safe options are available. A note to remember is the bulls offered are April calves, thus their weaning weights will be lower. We encourage you to look at the EPD's and adjusted weaning weights as these paint a more accurate picture of our offering. You may notice a smaller offering this year, and that's because we cut harder to provide a high quality offering. Quality over quantity is our motto.

If you have any other questions or would like to view the bulls in person, please don't hesitate to contact us. We look forward to visiting with you!

I had to dig in the semen tank to make this mating. His sire Cash is a proven powerhouse stud and this apple doesn't fall far from the tree.

Welcome To Our 9th Annual Private Treaty Offering!

Vaccination Protocol:

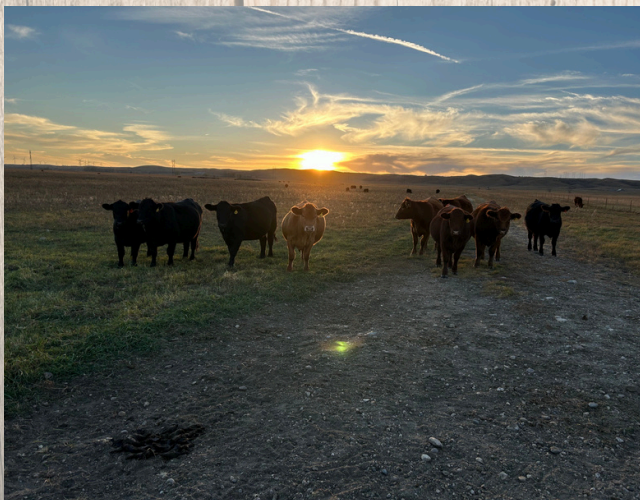

June: Vision 7 with Spur and Naslagen 3 PMH

September: Vision 7, ProBac 4, Virashield 6

November: ProBac 4, Express 5 HS, Injectable Dectomax

Developing Cattle:

The calves are raised on grass and their mother's milk only. We do not creep feed our calves as we feel we can better identify the higher growth oriented, superior performing lines. The bulls are being fed a 48 mCal ration of ground corn, silage, prairie hay, alfalfa hay, distillers grain, and protein pellets as well as free choice mineral. They are developed slowly to ensure longevity and structural soundness. We strive to provide continued growth and weight gain after the bulls are turned out for breeding and throughout the fall and winter months.

Delivery:

We will semen test, pour the bulls again, and start delivering the bulls April 1st. Delivery is free within the first 200 miles. Delivery past 200 miles will be dependent on the load. We will work with you to deliver your bulls by the most economical means possible.

Terms and Conditions:

Terms of the sale are cash and all cattle become property of the buyer once the buyer takes possession of the bull. All cattle will be registered with the American Simmental Association and those papers will be transferred after purchase of the animal.

Breeding Philosophy:

Our breeding philosophy may differ from others. You won't find extreme EPD's or 900-plus pound weaning weights. Most cattle have more genetic potential for weaning weights than their environment allows for. Instead, we are focusing on commercially relevant traits to improve your bottom line. Fertility, longevity, structural correctness aren't the hype words you see on sale ads. However, cattle who settle first cycle, stay in the herd for 10-plus years, and don't break down help keep you in the black. The females behind these bulls are hardworking, maternal dams that do just that. This, along with breeding for top 30% in the traits helps to keep our herd balanced.

To our customers, neighbors, and friends: Thank You for all that you do every day and all year!
